

Three phase industrial vacuum cleaners

A346/60 & A346 A546 & A546K

A346

The three phase industrial vacuums are the ideal machines for cleaning and vacuuming dusts and wastes in industrial environments, where a reliable efficient and practical vacuum cleaner is needed. They can be fitted with different kinds of filters in fabric with particular filtering categories according to the application needs. All versions are equipped with :

- Three phase motor, multi-voltage
- Star filter Ø460 with 12 pockets and big filtering surface
- Manual filter shaker
- Vacuum-meter with indication of the filter clogging
- 65 L. or 100 L. waste container on wheels, easy to be removed thanks to a practical release handle
- Quick inlet Ø70 for the easy connection of the accessories
- Wall plug 16A
- Compartment for the accessories
- Strong frame in painted steel
- Revolving wheels with brake and bearings so to grant ease of handling
