

## Single phase industrial vacuum cleaners

# ONE72SUBOIL & ONE73SUBOIL

ONE72SUBOILX2

Single-phase industrial vacuum cleaner suitable for general cleaning in industrial environments, specific **for sucking liquids and oil WITH shavings and chips.**

When the liquid inside the container reaches the maximum level possible, the suction is automatically stopped. By means of the assembled pump it is possible to empty the liquids from the container. When the liquid inside the container reaches the minimum level, the emptying operation is automatically stopped. By means of the manual valve it is besides possible to create a flow of the liquid inside the container.

All models are equipped with :

- Single phase independent motors
- Filter for oils Ø460
- Internal cyclone Ø460
- 70 L. container for liquids in painted steel or in stainless steel AISI 304
- 20 L. separator for chips and shavings
- Quick inlet Ø70 for an easy coupling of the accessories
- Strong frame in painted steel
- Revolving wheels with brake and wires protection
- Single phase centrifugal pump for the discharge of the liquids, with 0,15 KW of power and flow rate quantity of 40 L. /min
- Discharge tap for liquids
- Electrical switchboard panel to control sucking and discharging of the liquids
- Possibility to let the liquid flow inside the container to avoid the development of moulds and bed smells
- Possibility to the discharge the liquids during the sucking phase
