

## Single phase industrial vacuum cleaners

### ONE32ES & ONE33ES - ONE62ES & ONE63ES ONE102ES & ONE103ES

ONE33ES

ONE103ES

Single phase industrial vacuum cleaners suitable for general cleaning in industrial environments and premises, like machine shops, car washes and where it is necessary a powerful and efficient machine.

Thanks to the **electronic control** of the filter cleaning, the operator will not see any loss of suction and he hasn't to worry about of the filter cleaning.

In fact, this new patented system controls the filter clogging and it cleans automatically the filter according to set parameters.

Practical and easy to handle, all models are equipped with:

- Independent single phase motors
- Filter bag Ø460 of cat. "M"
- **Electronic filter cleaning system**
- **LCD Display** for an easy visualization of all working phases and of the vacuum cleaner conditions
- Waste container of 39, 65 and 100 litres, on wheels and easy to be removed thanks to a practical release lever
- Quick inlet Ø70 for an easy coupling of the accessories
- Accessory basket
- Strong frame in painted steel
- Revolving wheels with brake

All 39 L. models have got a total height of 116cm, so especially studied to be loaded into delivery vans even of small size
